## PRODUCT DESCRIPTION

The Astrodyne TDI ASX1100-xx/zz-12 is a medical grade multi-output low voltage power system in a 1U rack mount configuration that is Class I input, with 10 electronically controlled and monitored 2.2A outputs (combined max. 550W) and 2 15A outputs (combined max. 550W) manually controlled via front panel switches. All outputs are 2 MOPP isolation and BF leakage current protection.

This power supply can operate over the input voltage range of 90 to 264 VAC at 50-60Hz frequency and deliver up to 1100 Watts of regulated DC output power.

The ASX1100-xx/zz-12 has been certified to the IEC 60601-1 3rd Edition international medical safety standard and EN 60601-1-2 4th Edition for electromagnetic compatibility.
